

# Instructions for Installing and Using the DNP Examination Orientation Materials

## Installing the DNP Examination orientation materials:

- Double-click the InstallFredDNP icon.

Follow the on-screen prompts that will guide you through the installation.

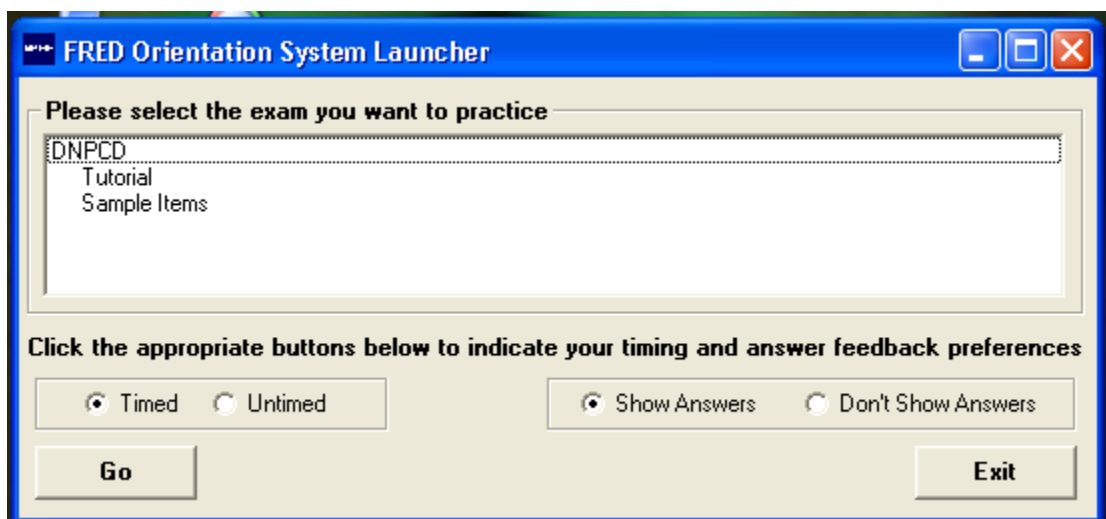

- After the installation is complete, you should see entries on your program menu

and a folder on your desktop for running the tutorial and the practice test materials. If the desktop folder does not appear, click on your desktop area and press the F5 key to refresh your screen, or right-click on your desktop area and select Refresh from the pop-up menu.

## Running the DNP Examination Orientation Materials

- To view the orientation materials, you must set your screen resolution to 1024 x 768. Please use your manual or system's help if you need assistance changing these settings.
- To start the software, double-click on the DNP Orientation Materials folder on your desktop, then double-click  icon.
- The following screen will appear:

- There are two sections to the orientation materials: Tutorial and Sample Items.

The tutorial portion will illustrate how the computerized test works and will provide the opportunity to practice before taking the test in November.

The sample items portion has 23 examples of test questions. Don't worry about whether you answer the questions correctly or not. Concentrate instead on learning how to answer the questions using the features of the computerized test.

- To run the Tutorial portion, click on Tutorial in the System Launcher window, and click on the GO button.
- To run the Sample Items portion, click on Sample Items in the System Launcher window and click on the GO button.
- When you are finished practicing, you will be returned to the System Launcher window. Click on the Exit button to finish your practice session.
